

Checkpoint Information

Checkpoint Created Successfully

Date: October 21, 2025

Tag: `checkpoint-before-content-changes`

Commit: `a582d75b9c47b16dcf40dc64280f585ffd7b3929`

What's Included in This Checkpoint

This checkpoint captures the **stable, fully functional state** of the NTAQV2 app before any content changes:

App Status

-  Running on port 3000
-  Preview URL working: <https://1571c35e96.preview.abacusai.app>
-  Full UI/styling functional
-  Database connected and seeded
-  All features tested and working

Files Tracked

- **293 files** committed
 - All application code
 - All components and UI elements
 - Database schema and migrations
 - Documentation files
 - Configuration files
-

How to Restore This Checkpoint

If you need to undo changes and return to this checkpoint:

```
cd /home/ubuntu/ntaqv2
git reset --hard checkpoint-before-content-changes
```

 **Warning:** This will discard ALL uncommitted changes!

How to Create Additional Checkpoints

As you make content changes, you can create more checkpoints:

```
# Add all changes
git add -A

# Create a commit
git commit -m "Description of your changes"

# Create a tag (optional but recommended)
git tag -a "checkpoint-name" -m "Description"
```

View All Checkpoints

To see all available checkpoints:

```
# View all tags
git tag -l

# View commit history
git log --oneline
```

Compare Changes

To see what has changed since this checkpoint:

```
# View uncommitted changes
git status

# View detailed differences
git diff checkpoint-before-content-changes
```

Best Practices

1. **Commit frequently:** After each significant content change
2. **Use descriptive messages:** Explain what you changed
3. **Tag important milestones:** Use tags for major versions
4. **Test before committing:** Make sure the app works

Important Notes

- This checkpoint is **local** to this machine
 - Changes are saved in `/home/ubuntu/ntaqv2/.git/`
 - The preview URL will always show the **currently running version**
 - To see changes in preview, restart the app after git operations
-

Ready for content changes! Your work is safely saved and can be restored at any time. 🚀
